XI Winter School on research methodology in urban studies, social sciences and spatial planning

23 gennaio, 14.15-16.15

Titolo: AI for academic research: tools, ethics and practice

Abstract

In this session we will explore how artificial intelligence is transforming academic research. Participants will discover the potential of AI tools for enhancing research productivity, exploring both the benefits and the ethical risks involved. The session will include hands-on activities using selected tools. Please bring your own laptop to fully participate in the practical exercises.
